Risk Considerations:

Preferred securities ("Preferreds") are "hybrid" securities, typically involving risks similar to both equity and debt securities. As with any investment, you can lose money through an investment in preferreds. Preferreds are usually issued by companies in the financial sector which involves additional risks than a more diversified investment, including the adverse effects of volatile interest rates, economic recession, decreases in the availability of capital, increased competition from new entrants in the field, and the potential for increased regulation.

Securities issued by foreign issuers, including Preferreds, are subject to additional risks including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions.

Certain Preferreds are rated below investment grade ("high-yield" or "junk" securities) or may be unrated. High-yield securities should be viewed as speculative and carry additional risks compared to investment grade securities. High-yield securities are subject to the risks of higher interest rates, economic recession, deterioration of the high-yield market, possible downgrades, and defaults of the interest, dividends and/or principal. High-yield security prices tend to fluctuate more than higher rated securities, and are more affected by short-term credit developments.

Stonebridge Advisors, LLC ("Stonebridge") has entered into a contractual agreement with an affiliate, First Trust Portfolios L.P. ("First Trust") to solicit clients for Stonebridge. Stonebridge pays 20% of its management fee to First Trust with respect to each solicited client for the first five years from the date such solicited client becomes a client of Stonebridge, and 10% each year thereafter. Since Stonebridge's management fees are based upon a percentage of assets under management, the more assets under management, the higher fee income to both Stonebridge and First Trust. In addition, due to such compensation, First Trust has an incentive to recommend advisory services of Stonebridge, resulting in a material conflict of interest which should be considered when making a decision to engage Stonebridge. First Trust will not be involved in the provision of services by Stonebridge.
